A. Managing Files

a. Adding Files: You can add image files; you want to convert into PDF document. There are four ways to add the files in the grid.

(i) Drag and Drop Files

You can just drag and drop files and folders into the application and it will search for the supported file types and add into the application.

(ii) Choose the files you want to add into application

Press  and choose the files you want to add.

(iii) Add folder and sub-folder with files into it

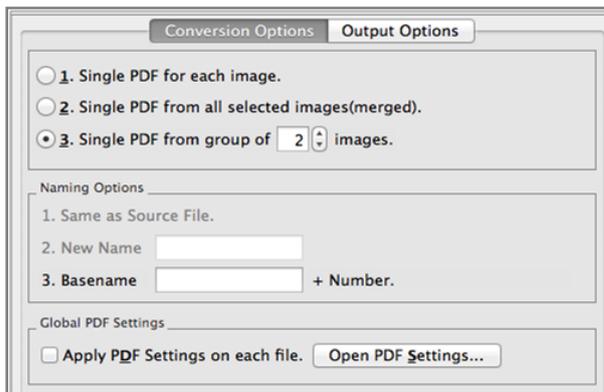

Press  if you want to add all the files in one folder. You can select "Include subfolder", if you have files within sub-folder. If this check box is checked the application will look for supported file types into sub-folder also.

(iv) Import Files

You can choose this option by clicking at  to add files into application if you have list of files into a text file. You can also copy and paste your list into text box.

b. Deleting Files: If you want to delete any file in the grid, select the file and right click -> Remove Selection or you can press Delete button on your keyboard as well or click at . If you want to delete all the files in the grid, either right click on any file -> Remove All or click at .

B. Conversions

a. Conversion Options: There are different requirements every time and for everybody. Considering this, there are three conversion options in Image to PDF Converter 1.0.

1. Single PDF for each Image
2. Single PDF from all selected images (merged)
3. Single PDF from group of images

1. Single PDF for each Image

With this option, you can convert one Image file into one PDF document. For example, if you have 500 image files, the application will create 500 PDF documents.

2. Single PDF from all selected images (merged)

With this option, the application will convert multiple image files into one PDF document.

3. Single PDF from group of images

If you want to convert specific group of files to be converted into one PDF document, this application is for you. You can choose any group size as per your requirement. For example you want to convert group of five files into one PDF document and another group of five files into another one, you can choose this option.

b. Naming Options: There are 3 conversion options and you can give/see 3 Naming Options for these conversions respectively.

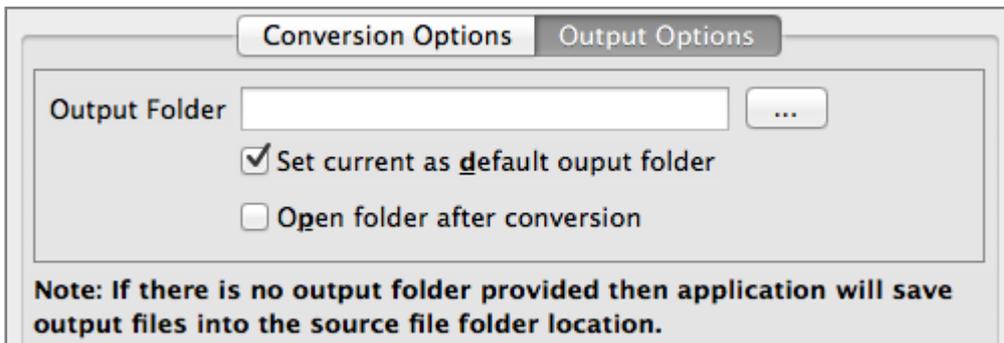

1. Same as Source File: Enable only when converting single image to single PDF file. New PDF file will have the same name as the base file.

2. New Name: Enable only when converting multiple images to single multi-page PDF.

3. Base name: This option is enabled, only when you are creating the multiple PDF files from the group of multiple images. You need to give a name to the file and the application will name all the PDF files by suffixing the number to the base name given.

c. Global PDF Settings: These are global PDF settings. You can choose to apply these on any newly created PDF document. These options are familiar to all who are using PDF Documents frequently, such as Description, Bookmark, Security and Restrictions. You can create password protected PDF file by giving the Open password under Security & Restrictions.

C. Output Options

You can choose output folder, where you want the file to be saved. You can also set the default Output folder for all the conversions.

If you wish to open the folder immediately after the conversion is over, you can select the option "Open folder after Conversion".

D. Export Export

You can export list of files you can see in file grid into text delimited text file. All the columns you can see will be exported in the text file separated by a tab.
